

2016-2017 Home School Program

Month: **November , Letter 3: Swamper's Risky Role in the Food Web**

Here is your home-work assignment which is due at next month's class.

Camouflage Critter Collage

For your camouflage critter collage, (1) you may pick one animal that uses camouflage and show that animal camouflaged in different scenarios or through the four seasons, or (2) you may make your collage using lots of different animals in camouflage.

You may find pictures from web sites or magazines to create your collage. Cut out the pictures, then glue your pictures onto poster board or large construction paper, making a collage. Don't forget to include a title on your collage. Please put your name on the back.
